Information for Lot #104

Baker/Hash Bred Heifers

If you're looking for an opportunity to buy a set of **Premium Quality, AI Bred** heifers here they are. These heifers are the best of the best, in my opinion with all the up-front work already done. These were 300 head to start with and sorted down to the top 200 head and then were pelvic measured, trachea scored, calf hood vaccinated and EID buttoned 30 to 40 days before breeding. These heifers were synchronized and 43 AI bred and 61 bull bred all in 1st heat cycle on May 18 through May 20. The bull is Yon Discipline REG# 20403242 and his CED #19 birthweight EPD is minus 2.4. We are offering the buyers to pick out of all confirmed AI bred heifers. These heifers will be checked by ultra sound on Aug. 20 by Dr. Mary Tomlinson of Cresthaven VET Services in Galax, VA. Dr. Mary has done all the herd management work on these heifers since the beginning so if you have any questions on any protocol feel free to call her at 276-233-4379. These bred cattle will be **sold in groups of 15.**
